# GOT A DOG, BUT NO SIDECAR?

**DOG FALLS ASLEEP AND SLIDES OFF THE PILLION?**

**GOT A SIDECAR BUT THE DOG ALWAYS CRAPS IN IT?**

You need the **JAWAPOOCH** dog carrier and exerciser (Pat. pend.)

Unique dual purpose control adjusts both **DOG ORIENTATION** (which way he's facing)

**\* AND \***

**DOG HEIGHT ABOVE ROAD**

\* In **carrier position** dog is held crosswise behind your bike and well above road

\* In **exercise position** dog is aligned with direction of travel and is held in contact with road. You can even align dog backwards to exercise those 'unused' muscles, or amuse dog by spinning him rapidly!

Large mounting plate fixes securely to top box for complete dog safety (bolts supplied)

Out of petrol? An extra turn of the securing screw and the dog will propel the bike!

Unique two piece dog-securing mechanism locates dog firmly and discourages wiggling

Please note: Use of the Jawapooch Dog Carrier and Exerciser® with dogs weighing more than 100kg may result in loss of steering. Not suitable for use with children.
